

How to whitelist your **EVA** App

Before you access the Employee Validation Application, we ask that some domains are whitelisted by your IT/technical teams.

Your IT team may need to white-list the Salary Finance endpoint on your company's firewall. This will allow EVA to communicate with our platform through your IT Security configuration.

The endpoint to whitelist is:

https://advance.salaryfinance.com/api*

Additionally to ensure that your work computers are able to access our services, we recommend whitelisting the following domains as well:

*.salaryfinance.com

*.salaryfinance.services

*.salary-finance-ecs-prod.com

https://s3.eu-west-2.amazonaws.com/encryption-app-salaryfinance-com/settings.js
on

https://auth.salaryfinance.services/api/

https://hrportal.salaryfinance.services/api/

https://eva.salaryfinance.com/

If your IT Team requires any further assistance, please feel free to contact us.
